

CECOMS Training Site — Fort Gordon

Project Information

Location: Augusta, GA

Construction Role: Prime, General Contractor, Design/Build Project

Contract Value: \$2.2 Million

Percentage of Work Self-Performed:

Approximately 30%

Work Diné Self Performed:

Site Design

Scheduling

Estimating

Project Management

Supervision

Contractor Quality Control

Building Erection

Site Work

Foundations

Date Construction Began:

October 2009

Date Construction Complete:

February 2010

General Scope of Construction Project:

Diné/BUCON, A Joint Venture was awarded the contract to design and build a three building modular training facility composed of 5,800 SF of administrative and laboratory space and 5,400 SF of classroom space. During the design phase of the project, Dine' worked closely with the CECOMS staff and the U. S. Army Corps of Engineers to insure that the facility met the needs of the training staff and stayed within the budget.

The CECOMS training schedule dictated that the project be complete and ready for use within four months of the notice to proceed. Through careful scheduling and extended work hours, Dine' and its suppliers subcontractors were able to turn the facility over to the user within 120 days of the NTP.

The facility includes seven classrooms with individual power and data connections and equipped for audio/visual presentations. An 1,800 SF covered Humvee dock serves as an outdoor classroom for satellite communication instruction. The Administration Building includes both private and open cubicle offices, all with voice and data connections. The project included over 4,000 feet of fiber optic cable installation, CATV systems, fire alarm and fire sprinkler systems, lightning protection, site utilities, fencing, landscaping, and a paved parking lot.
